# ABOUT PIZZA PUNK SQL PROJECT

## ABOUT THE PROJECT OVERVIEW

THIS PROJECT, TITLED “PIZZA PUNK DATABASE MANAGEMENT”, FOCUSES ON CREATING AND MANAGING A DATABASE FOR A FICTIONAL PIZZA OUTLET NAMED PIZZA PUNK. THE PRIMARY OBJECTIVE IS TO DEMONSTRATE THE USE OF SQL WORKBENCH TO IMPORT DATA FROM CSV FILES, CONVERT THIS DATA INTO SQL TABLES AND PERFORM VARIOUS SQL QUERIES TO RETRIEVE AND MANIPULATE THE DATA.

## Project Details

**Data Source:** The data for Pizza Punk is stored in CSV files, which include details about the menu, orders, customers, and employees. These CSV files serve as the primary data source for the project.

**Tools and Technologies:**

- **SQL Workbench:** A unified, cross-platform, open-source software that provides a robust environment for working with SQL databases.
- **CSV Files:** Used as the initial format for storing data.
